

# Product Change Notification

**Date: 16th September 2020**

**PCN: Aqualux 001**

## **Subject**

Change of 'AB' (Aged Bronze) finish for AQL-155, AQL-163, AQL-165 and AQL-166.

## **Description**

As part of our continued commitment to improved quality and workmanship, we have moved part of Lumena range from the Anodizing process to Powder Coating. Powder Coating finishes offer better colour consistency and greater weathering protection. This change does not affect the electrical or optical performance, the IP and IK ratings remain the same.

The Dulux Electro range is designed to mimic anodized aluminium while offering the best combination of features. For more information see here

<https://duluxpowders.com.au/products/electro/>

## **TimeLine**

Immediate.

## **Changes**

The finish for AQL-155, AQL-163, AQL-165 and AQL-166 has been changed from the Bronze Anodize process to a Powder Coat using Dulux 'Medium Bronze 9068183K'.

## **Affected Products**

AQL-155-AB is now AQL-155-A3

AQL-163-AB is now AQL-163-A3

AQL-165-AB is now AQL-165-A3

AQL-166-AB is now AQL-166-A3

## **Planned Changes**

Finish changes to the Lumena family will be progressively rolled out over a period of time.

PCN's will be issued as these changes are made. GG (Gunmetal Grey) will become Dulux Venerable Silver 9067621K and BK (Satin Black) will become

Dulux Black Ace 9069116F. The complete migration from Anodize to Powder Coat for all applicable fittings in the Lumena family is 30/11/2020. SC (Satin Chrome) will remain a clear anodized finish.
