

Aqualux Non-Dimmable IP67 Power Supplies

Technical Datasheet

Features

- Wide input voltage 85 - 265VAC
- Complete isolation design for safer operation
- IP67 suitable for indoor & outdoor use - indoor DO NOT COVER
- Flicker Free Design
- Short circuit, over-current & over-voltage protection
- Active power correction with high power factor
- 5-year warranty

Part Numbers

- AQD-WPS-030-24-N
- AQD-WPS-060-24-N
- AQD-WPS-120-24-N
- AQD-WPS-250-24-N

Notes

1. Unless otherwise specified, all specifications and parameters shall be measured at the input of 230VAC, rated load and ambient temperature of 25°C.
2. Ripple and noise measurement method: A12" twisted-pair line with 0.1uF and 47uF capacitors in parallel should be used for measurement under 20MHZ bandwidth.
3. The start time is measured under the starting of the cold machine. Frequent switching on and off may increase the start time.
4. The driver is regarded as a component used in combination with the terminal equipment. Since the EMC is affected by the whole device, the manufacturer of the terminal equipment needs to reconfirm the EMC of the whole device.

Product Notes

- This product must be installed and used as per its specifications.
- This product contains no serviceable parts and no attempt should be made to repair it. If the product is faulty it should be discarded.
- This product is not suitable for installation in hazardous and/or corrosive areas.
- Electrical installations periodically receive transient over-voltages. This product has been designed to minimize the effect of such voltages on connected equipment. It may not give full protection for extreme over-voltage transients such as those resulting from a close lightning strike.
